

Baktolan[®] protect

The water-in-oil (w/o) cream moisturises highly stressed skin with its rich formula that includes urea and protects the hands from water-based solutions.

Baktolan® protect

Advantages at a glance

- supports the natural protective function of healthy skin
- protects longlasting against harmful water-soluble substances
- effective prophylaxis against chapped and brittle skin
- targeted skin-care by urea and beeswax
- free of silicones and preservatives
- long-lasting protection
- free of parabens

Application

Baktolan protect is specifically developed for the prophylactic protection against occupational skin damage and prior to contact with water-soluble substances such as solvents, alkalis or acids. It can be used as a supplement to protective gloves, before starting work, after breaks and as intensive care after work. Baktolan protect provides long-lasting moisture to dry skin and makes the skin feel smoother. The natural ingredient urea provides for a proven skin hydration.

Areas of application

Baktolan protect is used in all areas where systematic skin protection against water-soluble solutions is required. At the same time, it provides chapped and brittle skin with the required care due to its rich cream. Baktolan protect is particularly suited for the daily use

- in clinics and medical practices
- in chemical, pharmaceutical and food processing areas
- in utility departments in cleaning services

Directions for use

Wash hands thoroughly before work and after every break and dry completely. Subsequently apply a hazelnut-sized amount of Baktolan protect into the hands paying particular attention to the areas between the fingers and the nail beds. Baktolan protect can also be used for the hand care after work.

Baktolan protect acts fourfold:

- as targeted skin protection before work
- as skin care in between
- as nourishing cream after work
- as effective prophylaxis against chapped and brittle skin (continued use)

Composition

Aqua, Paraffinum liquidum, Urea, Petrolatum, Cera Alba, Cholesterol, Lanolin Alcohol, Zinc Stearate, Aluminium Chlorohydrate, Sodium Stearate, Parfum (Fragrance).

Compatibility with hand disinfection products

Studies about hygienic hand disinfection according to EN 1500 show that the efficacy of BODE hand disinfection products Sterillium, Sterillium classic pure, Sterillium med and Sterillium Virugard, is not influenced by the previous use of Baktolan protect.

Compatibility with examination gloves

Studies following the EN 455-1 show that previous use of Baktolan protect does not increase the perforation rate of gloves made of nitrile, latex and vinyl. Studies following the EN 455-2 show that previous use of Baktolan protect does not impair the tear strength of gloves.
