

Sterillium® Gel pure

The fragrance-free variant of Sterillium Gel for particularly sensitive skin. Highly effective hand disinfection gel with comprehensive antimicrobial activity and a tried-and-tested moisturising complex.

Sterillium® Gel pure

Advantages at a glance

- comprehensive antimicrobial activity against bacteria, fungi and viruses
- including norovirus* activity within application time for hygienic hand disinfection
- increases skin hydration with regular use¹⁾
- excellent skin tolerability even with long-term use
- possesses an excellent immediate effect
- colourant- and fragrance-free

* tested with the murine norovirus (MNV)

Application

Sterillium Gel pure is suitable for hygienic and surgical rub-in hand disinfection for particularly sensitive skin.

Sterillium Gel pure is ideally suited for hygienic hand disinfection as an alternative to liquid hand disinfectants. It offers comprehensive and rapid efficacy thanks to its highly efficient formula with 85% ethanol. It evaporates quickly and leaves hands feeling soft – not sticky.

Sterillium Gel pure is used as ready-to-use alcohol-based rub-in product – independently of water and wash-basin – to prevent infection in all areas of health care and industry where hygiene is important as well as in home dialysis and when travelling.

Areas of application

Areas of application for hygienic and surgical hand disinfection in detail:

- in inpatient facilities and functional areas such as operating theatres, intensive care units and infection departments
- in treatment rooms and outpatient departments
- in ambulances
- in laboratories
- in emergency medical services
- in medical practices of all disciplines
- in home care of patients and elderly people
- in home dialysis

Directions for use

Use and dosage of Sterillium Gel pure depends on the respective area of application.

Hygienic hand disinfection

Apply sufficient amount of hand disinfectant to the cupped hand so that all areas of the hands can be wetted thoroughly and completely. Carefully rub in hand disinfectant for 30 seconds – cover all areas of skin.

Surgical hand disinfection

Thoroughly rub Sterillium Gel pure into hands and forearms up to the elbows. When treating hands, pay particular attention to fingertips, palms and thumbs. Hands and forearms are to be kept wet during the entire application time of 1.5 minutes.

Use disinfectants safely. Always read the label and product information before use.

Compliance depends on dermal tolerance of hand disinfectants

The effectiveness of hand hygiene measures, and with it, the prevention of hospital-acquired infection crucially depends on good compliance with hand hygiene guidelines. However, with healthcare workers being required to use hand disinfectants manytimes during the day, compliance is very much determined by products that are gentle on the skin.

Increase in skin hydration

Increasing evidence is supporting the benefit of alcohols in comparison with non-medicated soap or antiseptic soaps. Some gels (e.g. Sterillium Gel) significantly increase skin hydration after repetitive use and so help to enhance compliance with hand hygiene among healthcare workers (1).

Alcohol-based hand disinfectants with positive effects on the skin have long been a need for caregivers. It has been proven that a well-formulated alcohol-based hand gel containing skin-nourishing substances does not have any irritating or sensitising effect. On the contrary, with repeated use, it can actually enhance the skin moisture content significantly compared to untreated skin (1).

When selecting hand hygiene products it is therefore imperative to not only consider efficacy data and moderate prices, but also the personnel's acceptance to overcome common barriers to low compliance.

Sterillium® Gel pure

Proven efficacy

Exposure time

Active according to EN Phase 2 / Step 2 (practical testing)	Hygienic hand disinfection (EN 1500)	30 sec
	Surgical hand disinfection (EN 12791)	1.5 min

Bacteria and Fungi

Tested in accordance with EN Phase 2 / Step 1 (suspension tests)	Bactericidal (EN 13727)	15 sec
	Yeasticidal (EN 13624)	15 sec
	Fungicidal (EN 13624)	30 sec
	Tuberculocidal (EN 14348)	15 sec
	Mycobactericidal (EN 14348)	15 sec

Viruses

Active against viruses according to EN Phase 2 / Step 1 (suspension tests)	Virucidal (EN 14476)	1 min
	Limited spectrum of virucidal activity (EN 14476)	1 min
Tested for activity against non-enveloped viruses	Adenovirus (EN 14476)	1 min
	MNV (EN 14476)	15 sec
	Poliovirus (EN 14476)	30 sec
	Rhinovirus (EN 14476)	30 sec

Microbiology

Bactericidal, yeasticidal, fungicidal, tuberculocidal, mycobactericidal, virucidal against enveloped viruses (incl. HBV, HIV, HCV), limited spectrum of virucidal activity, virucidal

Composition

Active substance: Ethanol 850 mg/g

Compatibility with care products

Studies show that the efficacy of Sterillium Gel pure is not influenced by the prior use of selected Baktolan hand care products:

- hygienic hand disinfection acc. to EN 1500 after use of Baktolan balm, Baktolan balm pure, Baktolan lotion and Baktolan lotion pure.

Compatibility with examination gloves

Studies following the EN 455-1 and ASTM D5151 standards show that prior use of Sterillium Gel pure does not increase the perforation rate of gloves made of nitrile, latex and vinyl.
