Bacillol® Tissues
Alcohol-based rapid disinfection wipes in the practical dispenser.
Advantages at a glance
• ready-to-use disinfection wipes
• acts rapidly and comprehensively
• broad material compatibility with alcohol-resistant surfaces
• aldehyde-, colourant- and fragrance-free
• practical container ensures easy dispensing
• refillable

Application
Bacillol Tissues are ready-to-use disinfection wipes for rapid and convenient disinfection of alcohol-resistant surfaces and medical devices. For areas that require a comprehensive spectrum of activity within a very short time.

Areas of application
Bacillol Tissues are suitable for the uncomplicated cleaning and disinfection of:

Medical equipment as defined by the Medical Device Directive, such as:
• hand and angle pieces in dental practice
• stethoscopes
• other alcohol-resistant parts of medical devices

Surfaces that are not sensitive to alcohol according to BPR, such as:
• surfaces in hospitals, medical and dental practices, ambulances
• surfaces in medical laboratories, residential and nursing homes, etc.
• small objects and surfaces such as toilet seats, door handles, bed frames, and office desks
• in industrial kitchens and food-processing areas

Directions for use
Carefully wipe surfaces with Bacillol Tissues. Ensure complete coverage so that optimum disinfection is guaranteed. Thanks to their composition, Bacillol Tissues may also be used without gloves, if infection and occupational safety measures so permit. Do not use for skin cleansing. Dispose of used tissues. In order to prevent the wipes from drying out, close lid when not in use.

Do not allow disinfection solution to get inside of electrical devices. Please observe the manufacturer’s instructions.

Not suitable for the disinfection of invasive medical devices.

Use disinfectants safely. Always read the label and product information before use.

Microbiology
• bactericidal
• yeasticidal
• fungicidal
• tuberculocidal
• mycobactericidal
• virucidal against enveloped viruses (incl. HBV, HIV, HCV)
• limited spectrum virucidal activity
• MNV
• adeno-, polyoma- and rotavirus

Composition
Active ingredients of the solution: Propan-1-ol 450 mg/g, propan-2-ol 250 mg/g, ethanol 47 mg/g

Material compatibility
Information refers to the Bacillol AF soaking solution:

Bacillol AF was tested for compatibility with many materials including:
• Metals: stainless steel, aluminium, copper, brass.
• Plastics: rubber, latex, polystyrene, polyamide, polyethylene (PE), polypropylene (PP), PVC, silicone, Teflon (polytetrafluorethylene), Viton® (vinylidene fluoride-hexafluoropropylene copolymers), soft rubber (butadiene rubber).

When used correctly material damage is not to be expected.

Please note: Not suitable for acrylic glass and alcohol-sensitive (water soluble) lacquer. On sensitive surfaces, test for material tolerance in an inconspicuous area first.

Dimension of the tissues: 225 mm x 119 mm

The reach of Bacillol Tissues not only depends on their size, but also on further factors, for example, the ambient temperature and structure of the surface to be disinfected. Always make sure to completely cover the surface area.
